

Dear colleagues!

The St. Petersburg School of Economics and Management, National Research University Higher School of Economics invites you to participate in «**Innovations in the banking sector**» session of **Analytics for Management and Economics Conference**.

Changes in the banking sector in recent years have contributed to the development of the provision of banking services based on innovative technologies, modern methods and models of banking business management, aimed at increasing the competitiveness of credit institutions at the micro and macro levels. The traditional range of services provided by banks today cannot fully satisfy the needs of the client. There is a need to introduce new services and, accordingly, to develop methods for their provision. These facts create incentives for domestic credit institutions and the banking system as a whole to intensify the use of banking innovations. We kindly invite researchers, practitioners, and doctoral students to join our panel session on Wednesday, 07 October, at 15:00 Moscow time / 12:00 Greenwich Mean Time / 17:30 New Delhi time

The COVID-19 pandemic has made the changes to the usual conference format; this year conference will be held online via Zoom. We kindly ask to register [here](#).

If you have any questions or concerns, please, contact us at amec@hse.ru.
